REMARKS:

The specifications for the **NYALA SUPER MAIZE MEAL** provided on finished product specification documents for binding tariff information by the applicant to Classification, Valuation and Rules of Origin unit details;

1)Product Name: NYALA SUPER MAIZE MEAL

Packaging: 1kg Paper bag

Ingredients: Super Maize Meal, Minerals (Electrolytic Iron, Zinc Oxide) and Vitamins (A, B1, B2, B3, B6, B9)

The applicable heading for the **NYALA SUPER MAIZE MEAL** is **11.02** and was further classified under **1103.1300 – Groats and meal of maize (corn)**

11.03 – Cereal groats, meal and pellets

The cereal groats and meal of this heading are products, obtained by the fragmentation of cereal grains (including whole maize (corn) cobs ground with or without their husks), which, where appropriate, fulfil the requirements as to starch and ash content laid down in Chapter Note 2 (A) and which in all cases comply with the relevant criterion as to passage through a sieve laid down in chapter note 3.

As regards the distinction to be made between the flours of heading 11.01 or 11.02, the groats and meal of this heading and the products of heading 11.04, see the General Explanatory Note to the Chapter (item (1), second paragraph).

Meal is a more granular product than flour and is obtained either from the first sifting after the initial milling operation, or by regrinding and re-sifting the groats resulting from that initial milling.

This heading also includes meal (eg., of maize (corn)) pregelatinised by heat treatment, used, for instance, as an additive in brewing.
