The applicable heading for the **CHARLES LANG & SONS AND CHARLES LANG & DAUGHTER WINES** is **22.04** and was further classified under **2204.2119- Wine, alcoholic strength exceeding 8% but not exceeding 16%, 2L or less, in other material.**

**(I) Wine of Fresh Grapes.**

The wine classified in this heading is the final product of the alcoholic fermentation of the must of fresh grapes

This heading includes:

Ordinary wines (red, white or rose')

**(II) Grape must**

Grape must, obtained by pressing fresh grapes, is a greenish-yellow, cloudy liquid with a sweet flavour. It contains in solution a mixture of sugars (glucose and fructose), acids (tartaric, malic, etc.), albuminous, mineral and mucilaginous substances and the aromatic principles which give the wine its characteristics aroma and flavour.

Grape must, unless prevented, ferments spontaneously (the sugars being converted into alcohol); the end-product of this fermentation is wine.

The natural tendency of must to ferment can be inhibited by the process known as mutage which may either retard fermentation or arrest it completely.

**Note;** Under S.I. 87 of 2023 Customs Management (Prohibited and Restricted Goods) Regulations 2023, HS Code **2204.2119** is listed under Restricted Goods and an import permit is required prior to importation.
