The applicable heading for the **PARADISE FIT JUICES** is **20.09** and was further classified according to their constituent material.

**20.09 – Fruit juices (including grape must) and vegetable juices, unfermented and not containing added spirit, whether or not containing added sugar or other sweetening matter (+).**

As regards juices, unfermented and not containing added spirit, see Note 6 to this Chapter.

The fruit and vegetable juices of this heading are generally obtained by pressing fresh, healthy and ripe fruit or vegetables. This may be done (as in the case of citrus fruits) by means of mechanical "extractors" operating on the same principle as the household lemon-squeezer, or by pressing which may or may not be preceded either by crushing or grinding (for apples in particular) or by treatment with cold or hot water or with steam (e.g., tomatoes, blackcurrants and certain vegetables such as carrots and celery).

The juices of this heading may be concentrated (whether or not frozen) or in the form of crystals or powder provided, in the latter case, that they are entirely or almost entirely soluble in water. Such products are usually obtained by processes involving either heat (whether or not in a vacuum) or cold (lyophilisation).

Certain concentrated juices can be distinguished from their corresponding non-concentrated juices on the basis of their Brix value.

Similarly, intermixtures of juices of fruits or vegetables of the same or different types remain classified in this heading, as do reconstituted juices (i.e., products obtained by the addition, to the concentrated juice, of a quantity of water not exceeding that obtained in similar non-concentrated juices of normal composition).
